

### Benary:

Designed for those hard-to-grow, hot conditions of the South and for the bitter cold of the North, Fama pansies were bred for the extremes. 'Fama Peach Shades' feature unique, pastel shades that range from rosy pink to apricot to porcelain.

### Gintec Shade Technologies:

Electric drive units with reversing controls and built-in limit switches

operate Gintec's retractable screen systems. Winter heating bills can be reduced by as much as 50% when screens are closed at night. In summer, screens can be deployed during the day, lowering temperatures to an optimum growing range.

### Polygal Inc.:

Primalite heat-reflecting glazing from Polygal features a unique,

extruded twin coating. An exclusive filter layer that selectively reflects a large portion of near infrared radiation is covered by a tough, protective, UV-absorbing external layer. Primalite sheets are available in a variety of sizes and styles, and carry a 10-year non-prorated warranty when properly installed and maintained.

### Signature Supply:

ChromatiNet Blue shade cloth reduces the spectrum of red and far-

red light and increases the blue light spectrum, creating a compact plant with deeper green foliage. The grower can grow and ship more

quality plants per square foot using only sunlight. In some varieties, it can postpone flowering.

### Wadsworth Controls:

Wadsworth's outdoor shade system is an excellent investment for garden centers and nurseries. It cre-

ates an environment that keeps customers and plants comfortable. The shade system reduces the sun's heat stress on plants and prevents drying, and features a centrally positioned motor for efficiency and minimal structure strain.
