

Thermostats

The Wadsworth NEMA 4 thermostats are commercial grade controls that are designed to stand up to rugged real-world applications. Designed for outdoor and agricultural applications that are often wet, rugged and mildly corrosive environments. These weather-resistant, durable controls are for both heating and cooling in agricultural, industrial and commercial environments.

Two-Stage Thermostat Part Number E-1613

Features:

- Two stages for heating or cooling.
- Rugged, raintight, weatherproof control.
- Corrosion resistant materials for long life.
- High level of accuracy and sensitivity.
- UL listed, CSA NEMA 4X and N.E.C.
- Features two SPDT staged switches to support a variety of applications.
- Temperature range from 40° to 100° F / 4° to 37° C

Single-Stage Thermostat Part Number E-1612

Features:

- One stage for heating or cooling.
- NEMA 4X enclosure complies with N.E.C. article 547.
- Rugged, weather resistant enclosure.
- Corrosion resistant materials for long life.
- Low mass, high surface area of stainless steel coiled sensor provides rapid response to temperature change.
- UL Listed and CSA Certified.
- Temperature Range from 40° to 110° F / 4° to 43° C
