

4-Stage Control

Increase the performance of your system by adding a 4-Stage Control. The addition of this simple, centralized control integrates heating and cooling and eliminates both systems running simultaneously. That means increased functionality, and savings in energy costs.

FEATURES

- 2 setpoint periods (Day and Night)
- 4 stages; any mix of heating or cooling
- Includes solar-shielded temperature sensor with 75' of shielded cable
- Setpoint range: -40° F to 220° F
- Backlit LCD Screen displays current temperature, mode and output status
- Keypad provides easy operation
- Fahrenheit or Celsius scale
- NEMA 4 enclosure, 9" x 5.5" x 3" (228 mm x 140 mm x 76mm)
- Aspirated precision sensors included:
 - Solar-guarded temperature and humidity sensor and 100' of cable
 - Solar-shielded outdoor temperature sensor with 25' of cable

BENEFITS

- Brings precision control to your existing system
- Easy to install and operate
- Stages can be set for increased control of heating or cooling
- Improves crop quality by providing more accurate temperature monitoring
- Reduces fuel costs with a centralized temperature sensor
- You can calibrate to fit your needs
- Prevents heating and cooling from running simultaneously
- Easy to review settings from main screen
- Increases productivity with 2 setpoint periods
